YouChip Card Software

YouChip is the perfect choice when it comes to a card software solution that is able to encode, design and personalize (RFID-) chip cards. Compared to other software solutions you can save valuable time and costs with YouChip, since YouChip is able to encode and print plastic cards in just one working step. Through YouChip's optional, additional components you have the chance to only purchase encoding modules, that you really require.

YouChip works in combination with card printers or as a stand-alone-solution together with a desktop card reader. Since YouChip relies on the PC/SC standard, the chip type support is not limited to the desktop card reader that is in use. The communication is performed by APDUs (ISO7816 & ISO14443).

Features overview:

- Multiple functions for creating badge layouts (see page 3 for a detailed list)
- Reading of IAM cards
- Adding and removing segments
- Management of different coding instructions incl. adjustable writing-/reading area
- Reading and reporting of UIDs
- Import and export of complete projects
- Database access via SQL, ODBC and ADO
- PIN protection of writing-/reading functions, visual presentation of protected memory area
- Encrypted „KeySave“-Job-Script data and password request
- Data transfer as program parameter or directly from database index
- Wide range of log/protocol files incl. HEX-editor
- Supported operating systems: Windows XP, Vista, 7, 8, 10, Server 2008, 2012, 2012R2, 2016
- Supported virtual machines: VirtualBox, VMware, Parallels iOS

Supported contact-chip types:

All contact-chips can be encoded, that are supported by the reader in use (PC/CS standard):

- I²C-Bus types, like Atmel, STMicroelectronics, GEMplus
- ST14C02C... ST14E32
- M14C04... M14256
- GFM2K... GFM32K
- AT24C01A... AT24C1024
- EMV, Java Card, SmartMX

Supported RFID-chip types:

YouChip supports (depending on the encoding module Add-on) the following contactless RFID chip types:

RFID MIFARE Ultralight:	MIFARE Ultralight EV1, Ultralight C, Ultralight Nano
RFID MIFARE Classic:	MIFARE Classic 1K, Classic 4K, Classic EV1
RFID MIFARE Plus:	MIFARE Plus S, MIFARE Plus SE, MIFARE Plus EV1
RFID MIFARE DESFire:	MIFARE DESFire EV1, MIFARE DESFire EV2
LEGIC:	Prime (MIM 256 / 1024), advant (ATC 128-MV, ATC 256-MV, ATC 512-MP, ATC 1024-MV, ATC 2048-MP, ATC 4096-MP), CTC
More:	HITAG 125kHz via Elatec (limited), HITAG FEIG-ID via FEIG Reader, HID iCLASS, HID Indala, NXP ICODE®, NXP NTAG®, (ISO14443 & ISO7816, EMV, Java Card, SmartMX Kommunikation via APDUs)

Supported SAM modules:

NXP:	AV1, AV2
United Access:	PROTOS SAM V1.5

Version

Functions

YouChip Basic	Basic software with basic features for professional card printing
YouChip Instant	All functions of YouChip Basic + database connection via Text- and Excel-File
YouChip Pro	All functions of YouChip Instant + Batch printing function via ADO /ODBC, SQL-database connection

The YouChip versions “Instant” and “Pro” can be expanded with one or more encoding modules. For example: “YouChip Pro” can be purchased in combination with the “MIFARE” encoding module. Encoding modules can also be purchased independently from the standard versions.

ENCODING MODULES (optional Add-ons)

Contact	Encoding of contact-chip cards (I ² C-Bus types f. e. Atmel, STMicroelectronics, GEMplus; ST14C02C, ST14E32...M14256, GFM2K...GFM32K, AT24C01A...AT24C1024)
MIFARE	MIFARE Classic 1K/4K, Classic EV1, Ultralight, HITAG encoding
MIFARE Plus	MIFARE Plus, Plus SE, Plus EV1, Classic 1K/4K, Classic EV1, Ultralight, Ultralight C
DESFire	DESFire, DESFire EV1, DESFire EV2 encoding
LEGIC	LEGIC Prime, advant, CTC encoding

MORE

License Manager	Global network license. With the license manager YouChip can be used in networks without a local license and be sent to random working stations.

SOFTWARE BOX & INSTALLATION

Full Setup on USB Key

Access Protection with USB Dongle

Digital Manual

Enhanced Application-Tools

TOOLS & IMAGE

Directshow Image Acquisition

WIA & TWAIN Image Acquisition

1D, 2D, QR Barcodes

Image Acquisition through file

Database Connection

Signature-Pads

USER INTERFACE

Text and Image Editing in Card Design

Database View

Encoding View / Scripteditor

Multi-layout Designs

PRINT

Print Spooler Management

Front & Back Printing

Ethernet Printers Support

Batch Printing

Auto-Print

Different Elements / Database Controlled

DATABASE

XLS, XLSX, CSV & TXT

Internal Database with Photo Connection

Enhanced Database Connection (ADO / ODBC)

Enhanced Database Search

Access and SQLite with Photo Field

Search (query) Records

OLE Objects & Photo on Database Records

Enhanced Management & Protocolling

SOAP Interface

ENCODING

Magnetic Encoding

Contact Smartcard Plugin

Contact Smartcard Encoding

Contactless RFID Encoding / RFID-Support

DESFire, Ultralight, LEGIC Chip Card Encoding

APDU Encoding & Encoding via Script

Hybrid Card Encoding in one step

MISCELLANEOUS

Upgrades possible

Network License
